Erdem Aslan

AI Solutions Engineer | Applied AI & LLM Systems | Backend Systems & Automation

Istanbul, Turkey | erdemaslan1003@gmail.com | LinkedIn | GitHub

AI Solutions Engineer building and shipping LLM agents, AI automations and scalable software across real business workflows.

WORK EXPERIENCE

AI Solutions Engineer | Tam Hangers, Istanbul, Turkey (On-site) *Jul 2026 - Present*

- Coordinate the company's AI integration across departments, identifying repetitive workflows and implementing AI-powered automations.
- Build internal AI tools that simplify routine tasks and contribute to broader digital transformation initiatives.
- Use AI coding tools daily to prototype, ship, debug and iterate on solutions faster.
- Joined Tam Hangers in July 2026 and later moved into the full-time AI Solutions Engineer role after the IT Specialist internship.

Full-Stack Developer Intern | Proceedit Trading, Barcelona, Spain (Remote) *Oct 2025 - May 2026*

- Built Python/Flask and PostgreSQL backend components, REST endpoints and database integrations.
- Supported AWS/Kubernetes service operations and production analysis of CatBoost and LSTM models on financial time-series data.
- Collaborated with an international Agile team using JIRA and contributed to cross-platform prototypes with FlutterFlow and Figma.

iOS Developer Intern | Lideatech *Jun 2025 - Jul 2025*

- Built the FinFlow personal-finance app with SwiftUI, Firebase, Firestore authentication, MVVM and interactive dashboards.

Game Operator & Cook | Morey's Piers, USA (Work & Travel) *Jun 2024 - Sep 2024*

- Worked in a fast-paced multicultural environment, strengthening professional English, adaptability and teamwork.

SELECTED PROJECTS

LLM Distillation & Domain Specialization | Bachelor's Thesis | arXiv:2601.16219 *2025*

- Built a low-resource Qwen 2.5 7B domain assistant with Unsloth and offline knowledge distillation; achieved 96.7% accuracy with 500 examples and reduced A100 memory use from 40 GB to 16 GB.

Historai | FastAPI | Next.js | Groq | Gemini | Supabase *2026*

- Built a multi-agent alternate-history simulation engine with actor memory, random events, narrative reports, timelines and territorial maps.

Sentinel Tracker | React | TypeScript | CesiumJS | SGP4 | FastAPI *2026*

- Developed a real-time 3D Sentinel-1/2 tracker with orbit propagation, swath footprints, coverage mapping and overpass prediction.

Banking AI Platform | FastAPI | Kafka | Docker | PostgreSQL | Grafana *2026*

- Designed an event-driven microservice platform with KYC and fraud pipelines, retries, dead-letter queues, idempotency and observability.

EDUCATION

B.Sc. Computer Engineering | Duzce University *Jun 2026*

GPA 3.17 / 4.00 | Completed the four-year curriculum in 3.5 years | One-year English preparatory programme

Erasmus+ Exchange | Gdansk University of Technology *Feb 2026 - Jun 2026*

Fully funded learning mobility in Computer Science

TECHNICAL SKILLS

AI / LLM: PyTorch, knowledge distillation, quantization, LoRA/QLoRA, RAG, embeddings, LangChain, LangGraph, Hugging Face
Backend: Python, FastAPI, Flask, REST APIs, PostgreSQL, Firebase
Cloud / DevOps: AWS, Kubernetes, Docker, Kafka, Prometheus, Grafana, OpenTelemetry, Linux, Git
Computer Vision: OpenCV, EfficientNet, YOLOv2, image segmentation, remote sensing, CesiumJS

CERTIFICATIONS & TRAINING

Application Monitoring with OpenTelemetry | Mustafa Akgul Open Source Software Camp | Feb 2026
Blockchain & Ethereum Smart Contracts | Mustafa Akgul Open Source Software Camp | Aug 2025

LANGUAGES

English: Full Professional Proficiency (C1) | Turkish: Native
