Erdem Aslan

AI Solutions Engineer | Agent systems, integrations and evals | Python, FastAPI

Istanbul, Turkey · erdemaslan1003@gmail.com · sthonem.github.io · github.com/Sthonem · linkedin.com/in/erdem-aslan1

AI Solutions Engineer at Tam Hangers, building internal AI tools and automations for the company's departments. In my own projects I build agent systems with guardrails enforced in code, integrations that survive retries and duplicate webhooks, and evals that gate CI. Turkish native, English C1.

WORK EXPERIENCE

AI Solutions Engineer | Tam Hangers, Istanbul (on-site) Aug 2026 – Present

Joined Tam Hangers as an IT Specialist intern (27 Jul – 28 Aug 2026), then moved straight into this full-time role.

- Analyze workflows across departments and build AI-powered automations for repetitive, manual processes.
- Build internal AI tools that simplify routine work and bring AI into daily operations.
- Use AI coding tools daily to prototype, debug and ship solutions faster.

Full-Stack Developer Intern | Proceedit Trading, Barcelona, Spain (remote) Oct 2025 – May 2026

- Built Python/Flask and PostgreSQL backend components: REST endpoints and database integrations.
- Supported AWS/Kubernetes operations and production analysis of CatBoost/LSTM models on financial time series.
- Worked in an international Agile team (JIRA); prototyped mobile screens in FlutterFlow and Figma.

iOS Developer Intern | Lideatech Jun 2025 – Jul 2025

- Built the FinFlow personal-finance app with SwiftUI, Firebase (Firestore, Authentication), MVVM and interactive dashboards.

Game Operator & Cook | Morey's Piers, USA (Work & Travel) Jun 2024 – Sep 2024

SELECTED PROJECTS

VoiceOps FDE Sandbox | FastAPI · tool calling · RAG · PostgreSQL 2026

Turkish/English voice and chat agent for a fictional bank's contact center. Identity checks, confirmations and supervisor approvals are enforced in code; the agent calls mock CRM, core banking, helpdesk and scheduling systems over REST. 52 of 55 golden scenarios pass in CI (mock LLM and speech, synthetic data).

Integration Reliability Lab | FastAPI · webhooks · PostgreSQL · Redis 2026

Ordering hub that keeps mock POS, payments and loyalty systems in sync: signed webhooks, idempotency keys, an outbox with retries, dead letters and reconciliation. Six injected failure scenarios pass; 0 of 50 double credits after retried timeouts.

Agent Eval & Data Health Hub | DuckDB · FastAPI · Streamlit · CI gate 2026

Evals, data-quality checks and a CI regression gate for AI agents. Run over HTTP against VoiceOps (mock LLM), it found four problems VoiceOps' own evals had missed; all four were fixed and re-checked.

LLM Distillation & Domain Specialization | Bachelor's thesis · arXiv:2601.16219 (preprint) 2025

Offline response-based distillation into Qwen-2.5-7B with Unsloth and 4-bit QLoRA. Trained on 500 context-aware synthetic examples, the model scored 96.7% on the 30-question general test (90% on regulation questions) with robust rejection; training fit in 16 GB of GPU memory instead of 40+ GB.

Historai | FastAPI · Next.js · Groq · Gemini 2026

Multi-agent alternate-history simulation: LLM-driven actors decide turn by turn, and each run ends in a narrative report, a timeline and a territory map.

EDUCATION

B.Sc. Computer Engineering | Düzce University Jun 2026

GPA 3.17 / 4.00 · Completed the four-year curriculum in 3.5 years · One-year English preparatory program

Erasmus+ exchange, Computer Science | Gdańsk University of Technology Feb 2026 – Jun 2026

SKILLS AND LANGUAGES

Agents / LLM	tool calling, RAG, guardrails and approval gates in code, golden-set evals, CI regression gates, knowledge distillation, LoRA/QLoRA, PyTorch, Hugging Face, Unsloth
Integrations / backend	Python, FastAPI, Flask, REST, signed webhooks, idempotency, outbox, retries and dead letters, reconciliation, PostgreSQL, Redis, DuckDB
DevOps / cloud	Docker, GitHub Actions, pytest, AWS, Kubernetes, Kafka, Prometheus, Grafana, OpenTelemetry, Linux, Git
Also	Swift/SwiftUI, Firebase, transfer learning (EfficientNet), CesiumJS
Languages	English: full professional proficiency (C1) · Turkish: native

CERTIFICATIONS AND TRAINING

Mustafa Akgül Open Source Software Camp: Application Monitoring with OpenTelemetry (Feb 2026) · Blockchain & Ethereum Smart Contracts (Aug 2025)
